SAGAR GAJANAN SATAV

Software Engineer | +91 955217740 | satavsagar17@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience building scalable, secure, and user-friendly web applications. Strong expertise in React.js, Next.js, TypeScript, and JavaScript, with proven work on API security platforms, OWASP Top 10, CWE, Keycloak authentication, and browser extensions. Hands-on with Redux Toolkit for state management, RESTful API integration, and containerization with Docker.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, Python, HTML5, CSS3
Frameworks:	React.js, Next.js, Material UI, Tailwind CSS
State Management:	Redux Toolkit
APIs & Auth:	RESTful APIs, Keycloak (OIDC, JWT, RBAC)
Security:	OWASP Top 10, CWE, API Security
Tools:	Git, Jira, Docker, Linux, Selenium, Agile/Scrum
Other:	Browser Extensions (Chrome, Firefox), Responsive Web Design

PROFESSIONAL EXPERIENCE

Associate Software Engineer | *Geminus Tech, Pune* June 2023 – Present

- Plan sprints and manage day-to-day tasks in Jira, track work through delivery, contribute hands-on to frontend development, and collaborate effectively with backend, security, UX, and DevOps teams.

APIx — Enterprise API Security Platform Sept 2023 – Present

Web application

- Built the frontend for application, flow, and run workflows, from API discovery through threat analysis and remediation.
- Used Redux Toolkit for state across large modules, and REST APIs to show real-time security analysis and attack data.
- Integrated Keycloak for login, signup, email verification, cookie sessions, token refresh, and role-based access for Developer, PenTester, CISO, and Admin.
- Built separate Sense and Smash screens for CWE and OWASP mapping, tag filters, attack validation, and findings from HAR, raw, and browser traffic.
- Containerized the frontend and backend services with Docker and ran them together as the APIx stack.

Browser extension (Chrome & Firefox)

- Designed and built a cross-browser extension to capture API traffic from live websites and send it to the APIx platform.
- Captured API requests and responses in JSON, CSV, and cURL, with storage on the local system and in SaaS APIx.
- Optimized extension performance and improved user workflows for capturing and exporting live traffic.
- Wrote Python Selenium automation scripts to scroll pages, click through the site, and capture data, including a headless Docker run connected to the extension.

Release IQ Nov 2025 – Feb 2026

- Built Release IQ, a centralized platform for test cases, reports, automation tracking, and analytics.
- Built a scalable Next.js and TypeScript frontend, including server rendering and hydration, with responsive layouts in Tailwind CSS and Material UI.
- Integrated Jira workflows and backend services for release tracking, and improved performance and maintainability with modern React patterns.

CERTIFICATIONS

Certified Kubernetes Administrator (CKA) — The Linux Foundation Score: 79%
